

ENVIRONMENTAL DNA (eDNA) SAMPLING RESULTS

KYNETON
Thursday
26 April
4.30-5.30pm

FREE EVENT FISH OF THE UPPER CATCHMENT

Kyneton Mechanics Institute, 81 Mollison St Kyneton

Afternoon tea provided. All welcome.

Expert speakers will share results of eDNA sampling from the Campaspe and Coliban Rivers upstream of Lake Eppalock and their tributaries.

Results identify high biodiversity and the distribution of several threatened fish species and provide valuable baseline data to assess the effectiveness of current and future management actions.
