

Water Trade 101

Situation and Seasonal Outlook Webinar

This webinar will discuss the key features of the connected southern Murray Darling Basin water market and the current situation and seasonal outlook for water availability and price. The focus will be on providing practical knowledge and tips to inform farm water trading decision making.

TOPICS

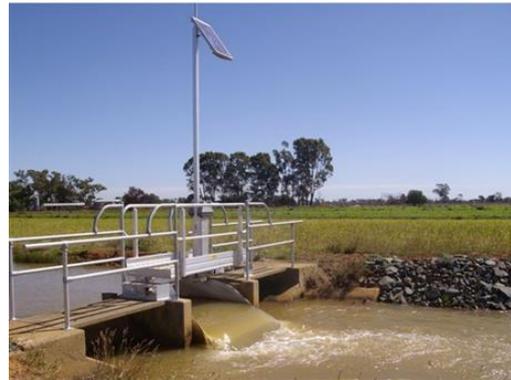

- Water trading tips for your farm business.
- ‘Situation and outlook’ for water availability and the market this season, including discussion of the key drivers.
- Different trading zones, water entitlement classes and volumes in the connected southern Murray Darling Basin (sMDB).
- Relative impact of allocations against different sMDB water entitlements on over-all water supply and the local water price.
- Implications of inter-valley trade restrictions.

EXPERT SPEAKER

Craig Feuerherdt. Business Development Manager. H2OX

Craig has been involved in the water industry since 2007. Prior to his role with H2OX, Craig was involved in managing a large water portfolio with Kilter Rural.

WHEN

Wednesday 30 September
1 to 2 pm
