

# Managing riparian weeds workshop

The North Central Catchment Management Authority (CMA) continues to work closely with communities to deliver lasting change across our region.

In the upper Campaspe and Coliban catchments, this has recently been through the Caring for the Campaspe and A Healthy Coliban Catchment projects.

To ensure landholders have the skills and knowledge to continue to manage weeds along their waterways, the North Central CMA would like to invite the community along to a free workshop.

**When: Sunday 16 February 2020, 9am – 11.30am**

**Where: Marsh Court Reserve, Woodend**

Speakers will include:

- Ben Perry, Biosecurity Manager, Agriculture Victoria - Riparian weed identification and best practice control advice
- Ashbourne Landcare's Weed Action Group – local control efforts

Free coffee van and plenty of fact sheets/information will be available. **Please BYO camp chairs.**

To register by 12 February 2020, go to:

**<https://nccmamanagingriparianweedsworkshop.eventbrite.com.au>**
