

Soil Health Analysis / Soil & Plant Biology

Friday 31st January 2020, Castlemaine

Hosted by The Mount Alexander Sustainability Group

David Hardwick
*Soil, Land & Food
Ecological Agriculture*

Develop a better understanding of the fundamental inter-relationships between healthy soils and plants, as an integrated system, to assist with improved decision-making, including the application of biological additives (composts, bio-fertilisers and stimulants) relevant to participants circumstances

Rebecca Mitchell,
Agriculture Victoria

Learn about the soil microbiome, soil testing, analysis and interpretation, drawing on participants own soil tests. Key parameters and strategies to maximise the productive capacity of the soil will be discussed. Soil references and guides to be provided by CMA.

Remember to bring along your soil test results (old or new) which you will receive next week

WHEN: Friday 31 Jan 2020
WHERE: Ray Bradfield Rooms,
Castlemaine
TIME: 11am – 3pm
