What did you get out of your involvement in the FSS Project?

What is the story of the FSS Project?

What can we say with confidence that the FSS Project has achieved?

What questions do you have about soil health that are still unanswered?

Did the FSS Project lead you to make any changes that you would not have otherwise made?

...or make you learn something new?

...or change the way you think about soil health?

The story so far...

**The FSS Project has
built...**

empowered...

established...

demonstrated...

created...

**What is something you know about soil health that you didn't know before the FSS Project?
(What is something you think differently about now?)**

What changes have you made, or what benefits have you seen, as a result of your involvement in the FSS Project? (For your own property, or what you've seen in the farming community)

Based on your experience, either as a farmer or non-farmer, what is the most valuable thing about the FSS Project?

Looking to the future...

Do you want to keep improving your soil health into the future?

Do you feel like you still have something to learn about soil health?

What are your priorities for soil health going forward?

What questions do you have about soil health that remain unanswered?

Conference feedback...

To what extent did the conference provide useful content that is relevant to you?

To what extent was the conference a worthwhile use of your time?

Overall, to what extent were you satisfied with the conference?

What was the best thing about attending the conference?

What should we do differently next time?

Unanswered questions

The way forward
