

# Free Native Vegetation Identification Workshops

**NORTH CENTRAL**  
Catchment Management Authority  
*Connecting Rivers, Landscapes, People*

The North Central Catchment Management Authority (CMA) Landcare team is holding four native vegetation identification workshops across North Central Victoria during September.

The workshops will give participants practical advice on how to recognise common plant families as well as using field guides and basic keys to properly identify species. Participants will be introduced to the classification and naming of vegetation along with vegetation survey techniques.
